1. Elzbieta ZYSK, Rozańska Alina ZROBEK: *Identification of seniors' residential needs in Poland*

Number of people in senior age has been constantly increasing, also in Poland. According to the Central Statistical Office of Poland, in 2030 the number of people over 65 years old will reach over 23% of the whole population in Poland. Therefore following question appears: where future seniors are planning to live? What kind of real estate property they will choose? Are they going to live with their family, rent own apartment or live in the nursing home? The aim of the article was to present residential needs of the current (65+) and future (in 13-15 year perspective) seniors. The aim was realized through the survey studies carried out over representative population sample.
